On The Go

HONEST ABE OFFERS GLOVES FOR EVERY PROMOTION AND BUDGET.

In 1919, Sam Shmikler, after working for ten years in glove factories, decided to start his own glove manufacturing company. His formula for success was simple: use the best raw materials, ship the goods when promised, charge a fair price and you will have the happiest customers around. By maintaining Sam's formula through four generations, Illinois Glove Company continues to be the leader in hand protection. This long history of craftsmanship and pride makes us the best in the industry.

Our work gloves are Professional-Grade. Our casual wear gloves are Retail Quality. We provide superior fit, comfort, quality & price for work, garden & outdoors. We have the finest imprinting and fast turnaround. We also make custom gloves, so if you are looking for a glove not seen here, please contact us or your distributor for more information.

Today, we continue to devise changes that make our gloves fit better, last longer and increase protection. Our goal is to provide our customers with the competitive advantage they need in today's marketplace. We guarantee you will be 100% satisfied.

Sincerely,

Jay Shmikler
President

HOW DO I FIND MY SIZE?

Using a ruler or measuring tape, measure the width of your hand (across the knuckles) to get a general measurement.

Use the guide below to see which size would fit best based on your results - if between sizes, size DOWN for a snug fit.

S/WM	M	L	XL	2X	3X
3.0”	3.5”	4.0”	4.5”	5.0”	5.5”

There is no “one size fits all” - every hand is different!

EMBROIDERED PATCH

A stitched design is produced into a patch. The patch is heat pressed onto the glove for a permanent seal. Includes 9 colors & up to 100% embroidery coverage. This is a great way to get that beautiful, professional, embroidered look & feel for a low price.

SILKSCREEN TRANSFER

A transfer is made using a silkscreen method and applied to the glove by heat and pressure. Stretches without cracking, washable & durable. Up to three colors. Used primarily on knit gloves.

4CP DIGITAL TRANSFER/DTF

A four color transfer is made using a special CMYK printer and then applied to the glove with heat and pressure. Stretches, washable & durable. A four-color process logo for only one set-up charge.

HEAT TRANSFER

A non-toxic wax imprint is transferred to the gloves with heat and pressure. Used on suede leather and fabric. Washable & durable. There must be separation between each color on a heat transfer. Up to two colors.

BRANDING/ DEBOSSING

A design is burned into leather using heat and pressure. No color is added with branding. Used on grain only.

PAD PRINT

A special rubber pad is applied to the gloves using a non-toxic ink. Choose one color only. Colors include yellow, white, red, royal blue, green, brown, black. Many more colors available.
